

Sertica is used for various purposes in the engine control room etc.

Oct 09, 2017 09:35 CEST

Sertica ensures uptime and quality

Every ESVAGT vessel now has the Sertica system implemented for purchasing and maintenance. It ensures quality, reduces the risk of breakdowns and can eliminate error related costs.

Implementing Sertica in the entire fleet has given ESVAGT the possibility of streamlining purchasing and maintenance. It will have a positive effect on quality, uptime and cost levels.

“Sertica opens up entirely new opportunities for optimising several parameters in our operations,” says Kristian Ole Jakobsen, Chief Operating

Officer for ESVAGT:

“We now have a more uniform product through which we can take full advantage of our experiences and competencies across the fleet. It will also strengthen our maintenance, where we can probably move more tasks from ‘repair’ to ‘service’. We expect this to bring increased reliability and a reduction in maintenance costs,” he says.

“Sertica has been implemented across the fleet for purchasing February 2016 and has an excellent track record,” says Carsten Larsen, Supply Chain Manager:

“We now have improved traceability in our deliveries, which has improved quality. Sertica has also made photo documentation possible, reducing the number of ordering mistakes. At the same time, it has freed up a great deal of time that used to be spent on administration that can now be spent on securing better commercial agreements,” he says.

About ESVAGT

ESVAGT is a dedicated provider of safety and support at sea, founded on an experienced and well-trained offshore crew and unmatched rescue capabilities.

We support the offshore Oil & Gas industries with a wide range of specialized services: Standby, Emergency Response and Rescue Vessels (ERRV), Oil spill response, Firefighting, Tanker assists, Rig moves, Supply services and Interfield transfer of cargo and personnel.

In 2010, ESVAGT brought the dedicated offshore wind Service Operation Vessels (SOV) to the market. The SOVs provide accommodation for technicians, spare time facilities, offices and conference room, storage for small turbine parts, workshops, etc. The SOV offers flexible personnel and equipment transfer capabilities by either Walk-to-Work gangway system or Safe Transfer Boats.

ESVAGT was founded in 1981 and has a fleet of more than 40 vessels and approximately 900 employees on- and offshore.
